

## CTDI Body Phantom Cradle

- Tape no longer needed to secure phantom
- Quicker phantom setup and centering
- Repositioning easier since tape is not used

### Phantom Cradle (NMTK-05)

This cradle was developed to support a 32 cm CTDI body dose phantom. The cradle is designed with a supporting radius of 16 cm and a base curvature to fit most CT tables. Cradle is constructed from closed cell polyethylene foam. Dimensions: 15 cm (l) x 34 cm (w) x 9.5 cm (h)
